# How to Use the iOS Mobile App (Parents)

Images below are from Apple devices, but the Android app looks very similar. [View Android images here](#).

|	
Step 1: Activate ParentVUE SIS Account	You will use the same username and log in for Schoology that you use for ParentVUE
Step 2: Download Schoology App from App Store. It's free!	
Step 3: Search for **Fairfax County Public Schools** (do not type the name of your school).	
Step 4: Log in	Your username and password are the same as what you use to log into SIS ParentVUE.
Step 5: See updates for parents	Your Schoology account defaults to parent view, where you will see updates from our All Parent course. Use the Navigation Menu in the top left corner to see what else is available.

| Step 6: View your child's courses	Click the top left corner to see the navigation menu. Then, choose "My Children." Here, you can view your child's activity in Schoology- courses, groups, and calendar.

Step 7: Switch between Student Activity and Enrollments	From **My Children**, you can switch between **Student Activity** and **Enrollments** (to view courses).
Step 8: Switch between children if you have multiple children in FCPS	If you have multiple children, tap "**More**" in the header to switch to a different child's view.

| ⭐Reminder | Please remember, any assignment or information that is posted as a Google Doc, Google Slides, Google Sheets, or anything else in Google Drive will **not** be visible to parents. FCPS has a protected wall, where only in-network people can view Google created materials. If you have a question about a specific assignment, ask your child to log in to show you or email the teacher for further questions. |
